## **NGP 200 Z negatoscope (New)**

- A brand new product,
- Made in Poland,
- **Advantages of using the NGP 200 Z negatoscope:**
  - Four lightly operating blinds allow the screen to "blend". This allows to describe images without side glare,
  - Accurate "blending" function also on the edges of small picture areas,
  - Very fast ignition of fluorescent lamps,
  - The device has no stroboscopic flicker effect, this protects the radiologist's eyes,
  - The ability to smoothly regulate the light intensity in the range of 10-100% of the maximum value allows to properly adjust the brightness of the screen to the described images and general lighting,
  - Saving the device's electricity by more than 25%,
  - The combination of appropriate light together with intensity regulation and the use of blinds allows better and more accurate description of details such as micro calcifications, which is particularly important for mammographic description,
  - Negatoscope emits daylight (Day Light) 6500K,
  - A convenient picture holder is located around the perimeter of the screen,
  - The slim, compact case is powder-coated, making it resistant to commonly used disinfectants,
  - Negatoscope has all required certificates,
  - Uniformity of screen illumination,
- **Technical data:**
  - Supply voltage: 230 V 50 Hz,
  - Power consumption: 140 VA,
  - Screen luminance: >4500 cd / m<sup>2</sup>,
  - Luminance control: YES,
  - Screen dimensions: 80 x 43cm,
  - Number of frames: 1,
  - Protection class: I,
  - Dimensions: 1120 x 690 x 120 mm,
  - Weight: 41 kg,
- Provided with an up-to-date Technical Passport,
- Guarantee: 12 months,
