NGP 300 Z negatoscope (New)

- A brand new product,
- Made in Poland,
- **Advantages of using the NGP 300 Z negatoscope:**
 - Four blinds allow easy "blending" of the negatoscope screen enabling description of images without side glare,
 - "Blending" is also possible at the edges on small areas of images,
 - Very fast ignition of fluorescent lamps,
 - The operation of the negatoscope has been deprived of the stroboscopic flicker effect, protecting the radiologist's eyes,
 - Smooth regulation of light intensity in the range of 10-100% of the maximum value allows the brightness of the screen to be most appropriately adjusted to the described images and general lighting,
 - Electricity savings of more than 25%,
 - Very good light with possible intensity regulation and use of blinds facilitates description of details such as micro calcifications, which is important for mammographic description,
 - Uniform illumination of the screen,
 - Negatoscope emits daylight (Day Light) 6500K,
 - Handy picture holder mounted around the perimeter of the screen,
 - The slim, compact case is protected with a powder-coated finish that is resistant to commonly used disinfectants,
 - The negatoscope has all required certificates,
- **Technical data:**
 - Supply voltage: 230 V 50 Hz,
 - Power consumption: 170 VA,
 - Screen luminance: >4500 cd / m²,
 - Luminance control: YES,
 - Screen dimensions: 105 x 43cm,
 - Number of frames: 1,
 - Protection class: I,
 - Dimensions: 1380 x 690 x 120 mm,
 - Weight: 49 kg,
- Provided with an up-to-date Technical Passport,
- Guarantee: 12 months,
