NBVE 60 SL germicidal lamp (New)

- A brand new product,
- Made in Poland,
- **The device is 100% safe for people! It has a PZH certificate (National Institute of Hygiene),**
- Germicidal and virucidal flow-through lamp NBVE 60 SL: with a timer,
- The use of energy-efficient germicidal flow-through lamps of the NBVE series is one of the most effective and safest methods of disinfection,
- The modern design of the NBVE series lamps ensures that harmful UV-C radiation does not get off from the device, so it is safe to use the NBVE series lamps while patients and staff are in the room,
- These devices emit UV-C radiation with a wavelength of 253.7 nm. This radiation has the strongest biocidal properties and irreversibly inactivates bacteria, viruses, molds, fungi and all other microorganisms,
- The process of air purification through the energy-saving NBVE series flow-through lamps is applied by the forced circulation of air through the disinfection chamber, in which the germicidal radiators are located. This flow is performed by a fan built into the lamp.
- The lamp has an electronic counter with a 4-field display with indications 1 h accuracy,
- The model is equipped with the function of acoustic indication of the moment of the radiator replacement (this element is also used to sum up the time of operation of the radiators),
- **Suitable for:**
 - Hospitals (surgery units, patients' rooms, emergency rooms, patients' wards, isolation rooms, A&E places, dirty linen rooms, etc.),
 - Clinics (doctor's and treatment rooms),
 - Laboratories,
 - Pharmacies,
 - The following industries: pharmaceutical, food-processing, cosmetics,
 - Hotel industry and gastronomy,
- **Advantages of NBVE 60 SL germicidal lamp:**
 - Mounting type: C - ceiling,
 - During the monthly use of this germicidal lamp, it is possible to save from 200 to 300 zlotys (the discrepancy in this amount are due to the different time of use),
 - The device has all certificates required,
 - The effectiveness of this lamp is confirmed by the results of specialized tests,
 - A consistently high degree of air disinfection is guaranteed,
 - Type: bacteriocidal flow-through lamp is a model that effectively disinfects the air in the presence of staff and patients,
 - User safety is enhanced by the forced air flow through the UV-C chamber,
 - Application: in operating units, patients' rooms, emergency rooms, laboratories, waiting rooms and other crowded places, as well as in kindergartens and nurseries - in addition, wherever a high degree of microbiological purity is required,
 - Case: acid-resistant sheet metal, which supports disinfecting properties and allows to keep the device clean,
 - Operation time counter: as a standard, we install an L-type counter (inductive counter with a display 1 h indication) in this model of germicidal lamp. However, we can use an LW counter (an electronic counter with a 4-field display with indications accurate to 1 h on customer request. The model is equipped with the function of acoustic signaling of the moment of radiator replacement)
- **Technical data:**
 - Ceiling-mounted lamp,
 - Power supply voltage: 230 V 50 Hz,
 - Energy-saving - power consumption: 85 W,
 - UV-C emitting element: 2 x 30W,
 - Radiant's durability: 9000 h,
 - Fan's efficiency: 132 m3/h,
 - Disinfected capacity: 25 - 50 m3/h,
 - Operating range of the lamp: 10 - 20 m2,
 - Anti-schock safety class: I,
 - Case type: IP 20,
 - Chamber's dimensions: 1125 x 215 x 130 mm,
 - Dimensions: 1190 x 330 x 130 mm,
 - Weight: 8,5 kg,
- It has a valid Technical Passport,
- Guarantee: 12 months,
