NBVE 60/30 PL germicidal lamp (New)

- · A brand new product,
- · Made in Poland,
- It has a PZH certificate (National Institute of Hygiene),
- NBVE 60/30 PL dual-purpose flow germicidal and virucidal lamp with two operating time meters,
- The use of energy-saving flow bactericidal and virucidal lamps of the NBVE series is one of the most effective methods of disinfection,
- This device can be used in two ways: when patients and staff are inside (then the airflow function of the lamp is used, and thus the biocidal UV-C radiation does not escape) or when no one is in the room,
- In this case, external irradiators are activated, which emit radiation with a wavelength of 253 nm into the environment, and thus effectively inactivate mold, bacteria, viruses, fungi and any other microorganisms from the irradiated surfaces,

Suitable for:

- · Hospitals (surgery units, treatment rooms, emergency rooms, patients' wards, isolation rooms, A&E places, dirty linen rooms),
- · Clinics (doctor's and treatment rooms),
- · Laboratories.
- · Pharmacies.
- The following industries: pharmaceutical, food-processing, cosmetics,
- Hotel industry and gastronomy,

• Advantages of NBVE 60/30 PL germicidal lamp:

- Mounting type: M mobile, on a tripod,
- For this germicidal lamp, our company offers two types of meters. Standard: L inductive model with a display with an indication of up to 1 hour. And also LW electronic counter (mounted on request) with a four-pole display (indication with an accuracy of up to 1 hour; function of acoustic signaling about the need to replace the radiant heaters),
 - The device has all required certificates,
 - The lamp has passed tests in a microbiological laboratory,
 - Type of case: made of acid-resistant sheet metal so it disinfects the air more effectively, and keeping the device clean is not a problem,
 - · Energy-saving model: significantly reduces electricity consumption,
 - Guarantee of high degree of air disinfection.
- Purpose: the device perfectly fulfills its function in operating rooms, patient rooms, corridors, emergency rooms, nurseries, kindergartens and production sites,
- The device has two radiators: the external one allows disinfection of the entire room during the absence of the users of the room/office; the internal one allows effective deactivation of viruses, fungi, mold and other microorganisms even during the operation of the office (i.e. when the staff and patients are in the room),
- Forced airflow through the UV-C chamber ensures that the harmful radiation emitted by the internal emitters does not escape to the outside.

• Technical data:

- $\circ\,$ The lamp is mounted on a mobile tripod,
- Supply voltage: 230 V 50 Hz,
- Power consumption: 115 W,
- Internal UV-C emitting element: 2 x 30W,
- External UV-C emitting element: 1 x 30W,
- $\circ\,$ UV-C irradiance at 1 m distance: 100 $\mu W/cm2,$
- · Radiant life: 9000 h,
- Fan capacity: 132 m3/h,
- o Disinfected volume: 25 50 m3,
- Operating range of the lamp: 10 20 m2,
- · Anti-schock safety class: I,
- Case type: IP 20,
- Chamber's dimensions: 1125 x 285 x 130 mm,
- Dimensions: 600 x 1270 x 600 mm,
- Weight: 13,0 kg,
- It has a valid Technical Passport,
- Guarantee: 12 months,
